

### Product Description

The ultimate welded connection that will never loosen, corrode or increase in resistance just got BETTER. CADWELD PLUS is the latest advancement in the continuing evolution of ERICO's exothermic products. Since its development in 1938, CADWELD electrical connections have become recognized as the ultimate connection for rail, cathodic, power and grounding applications. ERICO has established itself as the worldwide connections leader. CADWELD PLUS continues this tradition of technical leadership.

1 Insert CADWELD PLUS package into mold (optional: use with or without cover/baffle)

2 Attach control unit termination clip to ignition strip

3 Press and hold control unit switch and wait for the ignition

4 Open the mold and remove the expended steel cup - no disposal required
